

The Performance 360° is a highly useful diagnostic tool used to provide an overview for leaders of how their employees perceive themselves, their team and their leaders regarding specific key behaviours required for maximum performance.

Report provided in both hard & soft copy

The Performance 360° gathers information on how each person sees that situation TODAY. Each question requires the participant to answer from one of three perspectives:

1. Their perception of themselves
2. Their perception of their team
3. Their perception of their direct report, manager or leader.

The initial Performance 360° Benchmark and possible subsequent pulse checks, ensure the group and its leadership are staying accountable to the high performance behaviours they are working towards nurturing or eliminating.

**1** Every Performance 360° is custom built to meet the unique requirements of your team's culture.

**2** The results can be segregated into multiple collectors, allowing you to analyse overall results against particular groups.

**3** Collection & formatting of the results follows our strict privacy policy.
