

The Performance 360° is a highly useful diagnostic tool used to provide an overview of how students and staff perceive themselves, and each other regarding specific key behaviours required for maximum performance.

Report provided in both hard & soft copy

The Performance 360° gathers information on how each person sees that situation TODAY. Each question requires the participant to answer from different perspectives:

1. Their perception of themselves
2. Their perception of their peers or colleagues

The initial Performance 360° Benchmark and possible subsequent pulse checks, bring accountability to the behaviours people are working towards nurturing or eliminating.

1 Every Performance 360° is custom built to meet the unique requirements of your school.

2 The results can be segregated into multiple collectors, allowing you to analyse overall results against particular groups.

3 Collection & formatting of the results follows our strict privacy policy.
